# CeboSpark + CeboGliss

Base + CeboGliss Argento

Base + CeboGliss Oro

Base + CeboGliss Rame

Base + CeboGliss Blu

Base + CeboGliss Verde

Finitura per interni all'acqua dall'aspetto opaco che consente di realizzare decorazioni di elevato impatto estetico, sia in ambienti domestici sia in attività commerciali. Grazie alla facilità di applicazione risulta particolarmente indicata per la decorazione di grandi superfici. CeboSpark è presentato in un'ampia gamma di tinte utilizzabili tal quali o abbinata agli additivi CeboMagic o CeboGliss, che esaltano e impreziosiscono le superfici decorate alternando l'aspetto opaco della finitura allo scintillio della luce riflessa dai glitter. La versatilità del sistema consente infinite personalizzazioni a seconda della scelta colore e della combinazione con i diversi tipi di glitter. CeboSpark può essere utilizzato su fondi a gesso o a civile, opportunamente trattati. CeboSpark si applica diluito al 20% con acqua in due mani, con l'apposito pennello CeboSi da 2½ o 4 pollici procedendo a pennellate incrociate. Attendere l'avvenuta essiccazione (6-8 ore) tra una mano e l'altra.

## CeboMagic

Additivo in pasta per interni a base di micro-glitter olografici, dall'effetto ottico tridimensionale e multicolore. Aggiunto a CeboSpark conferisce un tocco di raffinata magia agli ambienti. Effettuare l'aggiunta di CeboMagic in tempi prossimi alla posa della finitura; utilizzare il prodotto additivato entro 6 giorni.

## CeboGliss

Additivo in polvere per interni, a base di glitter lamellari che aggiunto a CeboSpark conferisce alla finitura un aspetto scintillante. Effettuare l'aggiunta di CeboGliss in tempi prossimi alla posa della finitura; utilizzare il prodotto additivato entro 6 giorni.

## Preparazione dei supporti

Verificare che i supporti siano uniformi, perfettamente puliti e asciutti. In presenza di rasature recenti, fondi sfarinanti o assorbenti eseguire una perfetta pulizia del supporto e applicare preventivamente il fissativo isolante CeboFix M in una mano, a pennello, diluito 1:1 con acqua.

**FondoPlus:** fondo acrilico all'acqua, di elevata copertura e punto di bianco. Applicare il prodotto con rullo di pelo corto, in una o due mani, fino a completa copertura del fondo. A essiccazione avvenuta di FondoPlus procedere all'applicazione di CeboSpark.

## CeboVitra Più

Finitura protettiva all'acqua trasparente, lucida a base di resina poliuretanica per interni: le superfici trattate risultano lavabili e resistenti al graffio. Applicare CeboVitra Più, pronto all'uso, in due mani con rullo di pelo corto.

	prodotto	utilizzo	diluz. (acqua)	resa teorica	attrezzo	essiccazione	coloraz.
fondo	<b>FondoPlus</b>	interni	10%	8-10 m <sup>2</sup> /L		6-8 h	bianco
finitura	<b>CeboSpark</b>	interni	20%	7-8 m <sup>2</sup> /L		6-8 h	CeboKit e CeboCol
protettivo	<b>CeboVitra Più</b>	interni	pronto all'uso	8-10 m <sup>2</sup> /L		4-6 h	trasparente

Dovendo preparare più confezioni della stessa tinta, è consigliabile utilizzare prodotti e coloranti dello stesso lotto di produzione.
